DETAILED ACTION

Applicants' response of 10/31/03 has been considered with the following results.

Claim Rejections - 35 USC § 112

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In particular, claim 3 depends from claim 1; however, claim 3 recites desired results. The examiner is not clear as to how these desired results occur from the structure positively recited and respectfully requests further clarification.

As far as the claims recite positive limitations, the following rejections are made.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the

Art Unit: 2653

examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamakawa et al further considered with Ichimura et al.

With respect to Yamakawa et al, applicants' attention is drawn to the discussion with respect to figures 23 and 24 see for instance col. 9 line 31 plus. Which discusses the normalized detector ranges for an optical pickup having a NA of .6.

The ability of altering/providing for a NA of greater than or equal to .85 is taught by the Ichimura et al document.

This teaching is used to provide for a two-lens system with DVD discs.

It would have been obvious to modify the base system of Yamakawa et al with the above teaching from Ichimura et al, motivation is to use appropriate sil/two-lens systems for existing dvd players/discs.

With respect to the limitations of claim 3, the examiner concludes that the desired result(s) recited herein flow from the structure positively recited and hence are also met by the above combined references.

Allowable Subject Matter

5. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Hard copies of the application files are now separated from this examining corps; hence the examiner can answer no questions that require a review of the file without sufficient lead-time.
